V-SERIES™ 2

Entry level, angled leg economical canopy with upgraded features.

The V-Series 2 is an entry level, angled leg canopy that is designed for personal use. Unlike other entry level shelters, the V-Series 2 by caravan® canopy sports is bolted, not riveted so all of the pieces are stronger and can easily be replaced. Now with welded steel brackets this unit is ready to impress even the thriftiest shoppers.

V-SERIES™ PRO2

A straight leg canopy with maximum shade and strength at an economical price.

The V-Series Pro 2 by Caravan® Canopy Sports is the straight leg version of our popular entry level unit. The cathedral style roof design maximizes headroom clearance while the straight leg design provides the maximum amount of shade. As always, the frame is bolted, not riveted, allowing for parts to be easily replaced by the consumer. The V-Series Pro 2 now has strengthened aluminum brackets which also allow the unit to fold down smaller than ever before. The V-Series Pro 2 is a new take on Caravan's tried and true entry level, straight leg canopy.

M-SERIES™ PRO2

A step-up unit with a rising truss system for added strength and additional headroom. Commercial grade strength meets recreational grade portability.

The M-Series Pro 2 is the only canopy offered by Caravan® Canopy Sports with the rising truss system. The rising truss system combines the benefits of the full truss system's strength by reinforcing the truss bars, while offering additional headroom similar to the cathedral style frames. This step up unit has a lightweight steel frame which features pull pin technology patented by Caravan® and now features aluminum corner brackets. Caravan® boasts bolted, not riveted frames so that parts can easily be replaced by the consumer. The M-Series Pro 2 is a unique blend of commercial grade strength and recreational grade portability and affordability.
